## EDUCATION

---

<b>University of Pittsburgh</b> – PhD in Electrical and Computer Engineering	Expected Aug 2024
<b>University of Pittsburgh</b> – MS in Electrical and Computer Engineering	Apr 2021
<b>Istanbul Technical University</b> – BS in Electronics and Communication Engineering	June 2019

## RESEARCH INTERESTS

---

Signal Processing, Machine Learning, Statistical and Computational Modeling, Brain-Computer Interfaces, Deep Learning, Generative AI, Shallow Neural Networks, Quantization and Pruning, Domain Adaptation

## SKILLS

---

**Languages:** Python, C, C++, R, MATLAB

**ML Tools:** TensorFlow, PyTorch, scikit-learn, OpenCV, pandas, NumPy, SciPy, Matplotlib, seaborn

**Tools:** Git, GNU/Linux, AWS (S3, EC2), GCP

## EXPERIENCE

---

<b>University of Pittsburgh SPSL Lab</b> , <i>Research Assistant</i> – Pittsburgh, PA	Aug 2019 – Present
---	--------------------

<i>Hearing Aid EEG Project - Project Co-lead</i>	Jan 2022 – Present
--	--------------------

- Created a hybrid CNN-SNN structure using snnTorch with PyTorch for auditory attention detection, reducing the number of operations required by 50% while surpassing state-of-the-art algorithms by 15%
- Reduced the number of EEG channels by up to 87.5% while keeping the accuracy within a 5% bound
- Performed 8-bit quantization while keeping the overall accuracy within a 3% bound

<i>Augmented Reality EEG Project - Project Lead</i>	Aug 2019 – Present
---	--------------------

- Led a project on a human-in-the-loop system for rehabilitation of neglect in stroke patients using EEG data
- Collaborated with 10+ people coming from different cultural and industry backgrounds, such as engineers and occupational therapists
- Collected data from stroke patients in both hospital and lab environments using the developed BCI device
- Created preprocessing pipeline using MATLAB and Python that reduced noise in EEG data and increased the accuracy of machine learning algorithms by 15%
- Established real-time analysis procedures and built shallow neural network models using PyTorch that reduces the number of parameters by 30% while keeping the system robust
- Utilized autoencoders for domain generalization to suppress person-specificity of EEG data

<b>Istanbul Technical University</b> , <i>Undergraduate Research Assistant</i> – Istanbul, Turkey	Jan 2018 – June 2019
---	----------------------

- Studied state-of-the-art super-resolution and image reconstruction problems to create a graduation project and to build up an efficient MRI reconstruction modality
- Built a CNN model using TensorFlow for MRI reconstruction that increased peak signal-to-noise ratio (PSNR) by 0.34 dB while keeping model complexity and training time similar to other state-of-the-art modalities
- Researched super-resolution techniques and implemented state-of-the-art algorithms for comparison and trained a cohort of students about CNNs and GANs in image denoising and reconstruction

<b>ASELSAN</b> , <i>Engineering Intern</i> – Ankara, Turkey	June 2018 - Aug 2018
---	----------------------

- Developed a cross-platform heart-rate sensor and GPS tracker application using Python in a military-industrial corporation that focuses on research, development and manufacturing
- Provided a prototype to the engineering design team, assisted with field testing the application and devices
- Saved money and reduced overhead costs by cutting outsourcing fees by developing a single application for both PC and mobile phones instead of developing two different apps for iOS and Android, as well as PC

<b>EKTAM</b> , <i>Engineering Intern</i> – Izmir, Turkey	June 2016 - Aug 2016
--	----------------------

- Designed the automation scheme of automatic bottling machines by PLC programming in C++
- Presented the machines and automation pipeline to auditors and buyers, assisted with installation procedures

## PATENTS

---

- \* **Kocanaogullari, D.**, Akcakaya, M., Grattan, E., Wittenberg, G. F., Mak, J., Ostadabbas, S. & Huang, X. PCT International Application No. PCT/US2023/016885, 2023
- \* Gall, R., **Kocanaogullari, D.**, Akcakaya, M. & Kubendran, M. PCT International Application No. PCT/US2023/079463, 2023
